KHOA NGUYEN TRONG DANG

⚲ Ho Chi Minh city, Viet Nam | 📞 (+84) 938-928-064 | ✉ khoa15503.work@gmail.com | 🔗 /in/ntd-khoa | 🌐 Khoa15.github.io | ⓞ github.com/Khoa15

CAREER OBJECTIVE

A highly motivated IT person with a solid foundation in **software development** and a strong interest in **Artificial intelligence**. Eager to contribute to a dynamic technological environment by applying problem-solving skills and a quick learning ability to build innovative, robust solutions, driving the development of impactful tech products.

EDUCATION

Ho Chi Minh City University of Industry and Trade   08/2021 - 04/2025

Bachelor of Information Technology | **GPA: 3.23/4**

SKILLS

Programming: Python, Java, Javascript, SQL

Frameworks & Library: Pytorch, pandas, numpy, scikit-learn, FastAPI, Angular, Flutter

Databases: MySQL, Oracle, MongoDB

Tools & Platforms: Docker, Git, Linux

Others: Machine Learning Algorithms, Computer Vision, Research skills, Problem-solving

Languages: Vietnamese (Native) | English: **TOEIC(LR) 720, IELTS 6.0**

My certifications: khoa15.github.io/certifications.html

EXPERIENCE

Backend Intern   09/2024 - 12/2024

EdunetJSC

- **Researching** technical documentation from the open-source Frigate codebase, implement the detection module on the application.
- **Studying** and adjusting configurations resulted in a **2% improvement** object detection accuracy in the production environment.
- **Researching** IoT documentation, assist in maintaining water quality monitoring stations which are IoT devices.

AWARDS AND HONORS

- Participating in Euréka 2023.   12/2023
- Encouragement Award for "Emergent products and topics in the information technology field", HUIT.   7/2023
- First prize in "Young coder's Competition: Finding the Best and Brightest", HUIT.   6/2023
- Third prize in "Science Fair".   11/2020

PROJECTS

Sentiment Classification | Side Project

ⓞ github.com/Khoa15/deep-learning/blob/main/src/models/rnn.ipynb

- Built a basic RNN to classify sentiment (positive, neutral, negative) on financial news using Kaggle data.
- Preprocessed text (lowercase, punctuation removal, stopword elimination, stemming) and mapped words to indices.
- Assessed RNN's strengths in short-term sequence modeling and noted limitations with longer texts.

`python` `pandas` `numpy` `scikit-learn`

Exci | Leader

Team size: 3

- A simple app utilized Ollama to support users learning english. Using spaced repetition for personalized learning, create your own vocabulary collections. Search and save vocabulary through API dictionary.
- Prompting Ollama models to enhance vocabulary learning experience. One for AI chatbot, one for vocabulary search and save. Enhancing the user experience with a Flutter application.
- Developed a backend using ASP .NET to manage user data, vocabulary collections. Using Ollama system to handle AI chatbot and vocabulary search. Statistics and report in winform .NET application for admin.
Flutter | ASP .NET | Winform .NET | Ollama | Python

Age Classification | Leader

Team size: 3

- Responsible for developing and training Convolutional Neural Networks (CNNs) to classify images into 12 distinct classes using the UTKFace dataset.
- Build server python with Flask which is recieved request from client to classify age.
- Config client for request and receive response.

Python | React native | Tensorflow | Flask

Note-Taking | Leader

Team size: 4

- Developed a Spring Boot backend and REST API to manage notes, categories, and secure user authentication with full CRUD functionality.
- Integrated a Flask microservice for Optical Character Recognition (OCR), converting images to text using the Tesseract library.
- Designed and enhanced the Android application's UI to provide an intuitive experience for adding, updating, and deleting notes and categories.

Spring | Mongodb | Firebase | Android (Java) | Flask

Mini game SQL Injection | Leader

Team size: 2

- Designed and developed a game that helps us understand SQL injection in a database course. It supports multiplayer using WebSockets.

HTML, CSS & Javascript | Bootstrap | Websocket | Expressjs | SQL Server
